

Product data: Analog-CEM

Analog gauge for MOTORCYCLISTS:

NEW- The analog system for workshops and motorcyclists!

Our patented chain wear measuring system **CEM** (Chain Elongation Measurement) is now also available **analog**.

The **increase in length** is the industrially standardized, only correct indicator for determining chain wear.

With the inexpensive, newly developed system, this test can now be carried out quickly, precisely and very easily in handling.

Convince yourself!

Article description: **Analog-CEM (Chain Elongation Measurement) for motorcyclists / workshops**
