

Product data: PDL® E-Bike - Pedelec

200ml

The enormous torques in the E-Bike or Pedelec sector require more pressure-resistant lubricant components than is usual in the bike sector.

Exactly because of these qualities and **in connection with the completely non sticky and always clean application** our PDL® was known in the motorcycle sector.

So what is closer than use this enormous developmental edge for the arisen requirements in this vehicle segment.

**Derailleur, deflection rollers and sprockets remain free from dirt.
Therefore they work permanently precise and reliable.**

Article description: **PDL® E-Bike - the original dry film chain lubrication - (since 1995)**
